PAINT

This time of the year has become a more or less established custom as the time to clean up and paint up. This year the price of paint has advanced considerably, and none of the manufacturers will guarantee their prices for any length of time. If you are thinking of painting, right now is the time, because it is a certainty that it won't be cheaper, but it is more than probable that it will go up in a short time. Devote paint is the acknowledged standard. It takes fewer gallons and wears longer.

EXPRESSIVENESS

in clothes for men and young men

Clothes must be more than mere clothes to express the individuality of the man. HIGH ART CLOTHES are expressive not of their price but particularly of character.

Their models for young men fairly bubble over with youth—their models for those of sedate taste express conservatism—their models intended for men of every stature are not affected by mere size proportion but are designed essentially for that particular type of man.

You can best express the evidence of your good taste in dress by wearing these expressive clothes for men and young men. Their dependability goes without saying and their service is guaranteed by both the manufacturer and by us, as usual.
